

Reviews

"Passport is a real accounting program with good audit trails. They have excellent customer service and are always willing to assist with any issue we might be having. Additionally, in the context of Passport's overall cost compared to other programs they are very cost competitive."

"We looked long and hard before going with Passport and I am very happy with our choice."

The transition and training were handled professionally and made as easy as possible. One of my favorites is the manufacturing side which is logical, easy to use..."

"I love the flexibility in setting up financial statements. This is real accounting software unlike many others. I used this software for over 20 years at another job. When I took over this company I couldn't wait to transition to this software again. I can recommend it to anyone who needs more than Quickbooks."

"We are a manufacturer with three separate locations that produce both production parts and job shop products. Through the years as our companies have grown, we've seen PBS software grow with us. We're very satisfied with their integrated software and the professional expert support that goes along with the product. We look forward to a continued partnership as we continue to adapt and grow in an ever-changing market."

Why Passport Software?

Your Trusted Partner for Business Software Solutions

Founded in 1983, Passport Software, Inc. is a trusted provider of accounting and business software solutions to small and medium-sized businesses. Over the years, we've supported thousands of installations globally, offering flexible and reliable software for companies with annual sales ranging from \$5 million to \$100 million. We specialize in industries such as retail, manufacturing, and distribution, with comprehensive solutions that include accounting, payroll, and specialized tools like EDI and ecommerce integration.

Comprehensive Software Solutions to Help Businesses Grow

Passport Software is dedicated to providing small to mid-sized business with customized solutions that drive efficiency, compliance and growth. From manufacturing to accounting, we have you covered

Accounts Payable

Passport Software's Accounts Payable module can help maintain good credit ratings by managing cash wisely. Keep accurate information on vendor, supplier and costs by tracking payment due dates, available discounts, and money owed to creditors. Pay vendors via ACH for faster turnaround for discounts.

Accounts Receivable

Our Accounts Receivable module tracks money owed by customers, identifies delinquent bills, and helps improve cash flow with invoices and statements sent out as PDF's for faster collections.

General Ledger

Passport's General Ledger module categorizes and summarizes your accounting data providing comprehensive information for financial analysis and control. Multi-user and multi-company with consolidations.

Check Reconciliation

Reconciling checks is one of the most important financial controls for any business. Ensure the money that leaves your business is accounted for with our Check Reconciliation software.

Payroll

With over 40+ years of payroll development experience, Passport Software provides comprehensive yet easy to use in-house, on-premise payroll software for small and medium-sized companies. Multi-city, multi-state features with ACH Direct Deposit and pay advices emailed to employees.

ACA Compliance

Our IRS-certified ACA Software helps you comply with ACA mandatory reporting throughout the entire year and provides automated 1094/1095 filing. Prefer to outsource your ACA compliance? We provide quick and easy Full Service ACA Management for businesses year-round.

Accounting for NCR Voyix Counterpoint

CashPoint™ is a powerful back office accounting solution that offers the tightest integration available for NCR Voyix Counterpoint users. CashPoint is easy to use and offers automated data integration, as well as an optional payroll module to manage payroll in house.

PBS Manufacturing ERP Software

PBS Manufacturing delivers powerful, integrated tools to streamline production, manage inventory, and optimize your supply chain. Designed for growing manufacturers, it provides real-time insights, flexible reporting, and the scalability needed to improve efficiency and drive profitability.

Basic Bundle

A cost-effective solution for small manufacturers with simple needs or tight budgets. This bundle includes inventory management with basic material planning, product definition, customer order processing, and product purchasing, allowing businesses to manage their basic operations with ease.

Planning Bundle

Designed for companies manufacturing complex products or dealing with high sales volumes and seasonal demand. The Planning Bundle includes everything in the Basic Bundle plus Master Scheduling and Material Requirements Planning (MRP), an advanced planning tool to help you forecast and plan for future production needs. Additional features like Capacity Planning allow you to better allocate resources and avoid bottlenecks in production.

Control Master Bundle

This bundle is ideal for businesses with a focus on job costing and shop floor scheduling. In addition to the features in the Basic Bundle, it includes Shop Floor Control and Manufacturing Job Costing, giving you enhanced production scheduling tools, labor tracking and management tools, and help you maintain accurate cost tracking.

Complete Bundle

A fully integrated and comprehensive ERP management tool that allows you to manage every aspect of your operation. This bundle includes all eight PBS Manufacturing modules, offering a complete, all-in-one solution for businesses looking for full control over their manufacturing, financials, and other key operations. It's a

Distribution Software

Inventory Control

Tracks inventory to maintain optimum levels. Generates complete information on inventory valuation, quantities on hand and committed, and the flow of items sold.

Order Entry

Order Entry processes customer orders quickly and accurately. Includes inventory verification when entering orders, immediate customer information, and discount levels calculated. Tracks and processes serial numbers, lot control and multi-warehouse, multi-stocking unit features.

Purchase Order Management

Helps manage the status of all goods and services ordered from vendors. Individual as well as blanket purchase orders.

Sales Analysis

Helps you identify your best customers, best selling items and services, productive sales reps, and strong sales regions.

Point of Sale (POS)

Point of Sale provides functionality for a mix of retail/wholesale and mail order/catalog sales. Single screen transaction entry makes Point of Sale easy to learn and use.

EDI and Ecommerce

Integrate with your preferred ecommerce platform and exchange data effortlessly with suppliers and customers. PBS supports EDI transactions, allowing for smooth, error-free communication

Pick n Pack

Streamline your picking and packing processes with integrated barcode scanning. PBS ensures that your orders are picked, packed, and shipped with the highest accuracy, reducing errors and boosting customer satisfaction.

Wayfair Sales and Use Tax Compliance

PBS includes built-in features to manage sales and use tax compliance for remote sellers, helping you stay up to date with Wayfair's regulations and avoid costly penalties.
